4:	A Message from Damon E. Jaggars, Vice Provost and Dean of University Libraries
5-8:	Full List of All 2021 Faculty Recognition Program Honorees
9-140:	Book Selections and Personal Statements (Note: Not all honorees selected a book.)
141:	Acknowledgements

A Message from Damon E. Jaggars, Vice Provost and Dean of University Libraries

On behalf of the Office of Academic Affairs, the Faculty Club, and University Libraries, congratulations on your achievements in tenure and promotion. The Faculty Recognition Program acknowledges the personal success this milestone represents in your career. Tenure and promotion are granted after a rigorous review of a faculty member's sustained record of excellence in teaching, service, research and publication. The individuals honored here have been recognized on campus, nationally and internationally for accomplishments in their fields.

The granting of tenure and/or promotion rewards the commitment of time, effort and thought on the part of each honoree. As Provost Dr. Melissa L. Gilliam said, "The work that you do transforms individual lives, families, communities, and society. In the same way, your work also has the power to inspire your colleagues and to elevate our collective ability to contribute answers to the world's most daunting challenges."

The faculty members granted tenure and/or promotion in 2021 were provided the opportunity to select a book from the University Libraries' collection to be digitally book plated and added to the catalog in their honor. Honorees were also invited to include a personal statement about the book's significance to them. The reasons particular works were chosen are as diverse as the honorees. Some were significant because of a relationship with the author; others, because of the subject matter covered, but each one impacted the honorees personally or professionally.

The Ohio State University Libraries aspires to be the leading library advancing the educational, research, and engagement missions of a national flagship public university. We look forward to supporting your teaching and research, and adding works you create into the ever-growing repository of information that the Libraries has become.

President Kristina M. Johnson noted, "During my tenure in higher education, I've learned that the main factor that takes a good university and makes it an exceptional one is the quality and the caliber of its faculty. And Ohio State and its faculty are nothing short of phenomenal in every way."

It is an honor to work with this outstanding faculty.

Full List of All 2021 Faculty Recognition Program Honorees

First Name	Last Name	Promotional Rank	College	Department
Eric	Adkins	Promotion to Professor-Clinical	College of Medicine	Emergency Medicine
Anita	Afzali	Promotion to Professor-Clinical	College of Medicine	Internal Medicine
Amna	Akbar	Promotion to Professor	College of Law	College of Law
Jennifer	Aldrink	Promotion to Professor-Clinical	College of Medicine	Surgery
Ahmad	Al-Jallad	Promotion to Professor	College of Arts and Sciences	Near Eastern Languages and Cultures

Principles

Ray Dalio

I selected this book because it highlights the importance of how to handle life events and manage teams of people you work with. It highlights the importance of treating people well, but also with honesty. The book describes ideas about seeking knowledge, giving critical feedback to individuals, believability, and many other important principles. Whether in medicine or other endeavors, these principles can serve as a blueprint to help anyone be successful in their life or career.

Linear Programming and Extensions

George B. Dantzig

George B. Dantzig is acclaimed as the “father of linear programming,” a mathematical field which aims to optimize systems. He was one of the early proponents of incorporating uncertainty in optimization models and wrote one of the seminal papers that started my field of stochastic programming. I feel very lucky that Dantzig happens to be my academic grandfather. His work inspired me. I hope it will inspire future students of optimization under uncertainty.

Mickey Mantle: America's Prodigal Son

Tony Castro

Mickey Mantle was my father's favorite baseball player. He was his hero. Since my father is my hero, that makes Mantle my hero's hero, my grand-hero. I have had the good fortune to receive excellent mentoring in my career. That said, my father is the best and most patient teacher I've ever met. I saw it with his students. I saw it with my brother and me. I see it now with my children. I am really lucky to be his son.

*Fulfilling the 21st Century Land-Grant Mission: Essays in
Honor of the Ohio State University's Sesquicentennial
Commemoration*

Eds. Stephen M. Gavazzi and David J. Staley

I selected this book because it highlights the countless ways The Ohio State University has - and continues to - fulfill the mission of being the "people's university." As an Ohioan who got his start in the university's 4-H Youth Development Cooperative Extension programs, and who has dedicated his life's work to paying it forward, this collection of essays brings focus to the importance of 'Disciplina in civitatem': education for citizenship.

History

The Glory and the Sorrow: A Parisian and His World in the Age of the French Revolution

Timothy Tackett

I selected this book in celebration of my mentor, Timothy Tackett. *The Glory and the Sorrow* is the most recent book among the many books authored by Tim. In every one of his books, he reveals with great care how the past was experienced. His dedication to his research and to his students inspires me.

The Works of Mary Robinson

William D. Brewer, General Editor

Engraved on her tomb in a churchyard in Old Windsor, Mary Robinson's words reflect her desire to be remembered: Yet o'er this low and silent spot, Full many a bud of Spring shall wave, While she, by all, save ONE, forgot, SHALL SNATCH A WREATH BEYOND THE GRAVE! I have spent many hours with Mary - contemplating her words, researching her life, exploring her world. May others find the genius in her works that continues to fascinate me, and may these volumes preserve her deserved "wreath of fame."

Homer's Odyssey

Homer, S. O. Andrew (trans. By)

The Odyssey is one of the greatest epic pieces of literature of the ancient Greek world by Homer. Remember, life is an odyssey. Enjoy the journey!

*The Curse of the Self: Self-Awareness, Egotism,
and the Quality of Human Life*

Mark R. Leary

This book is an accessible work of scholarship that explains that although humans have the capacity for self-awareness/self-reflection, we frequently 'get in our own way' because our inner self-talk creates obstacles and challenges that impede our success and happiness. I have great admiration and appreciation for the author for both his scholarly contribution to Social Psychology and his generous willingness to serve as a role model to aspiring academics and junior colleagues.

Biomedical Education and Anatomy

A History of Human Anatomy

T. V. N. (Vid) Persaud, Marios Loukas, R. Shane Tubbs

A solid foundation in human anatomy is crucial to the development of a student's career in the health field as anatomy is the language of medicine. Therefore, it is vital that all involved (e.g., learner and instructor) have an awareness of where their curriculum comes from – both the good and the bad. Both need to be understood and discussed, although some aspects may not be comfortable (e.g., grave robbing), which can lead to robust conversations in the classroom.

Quiet: The Power of Introverts in a World That Can't Stop Talking

Susan Cain

This book is the first I've read that really made me stop and think about using something I had always thought of as a limitation, or a weakness, as an asset, a true advantage in my personal and professional life. I loved every word of it, saw myself in the pages of it over and over again, and came away from reading it with a really fresh perspective on interpersonal relationships and what success looks and feels like. I loved it; I wish I had read it 30 years ago, it was a game-changer for me.

*Stranger in the Shogun's City: A Japanese Woman
and Her World*

Amy Stanley

This book elevates the field of Japanese history to new heights. It pieces together opaque fragments from the past to shine a spotlight on an ordinary woman from early modern Japan. Stanley not only deciphers rare family manuscripts from the late Edo period (1603-1868), but also synthesizes these into a highly readable and award-winning trade publication. Painstakingly researched and analyzed, her work is path breaking, fresh, and inspirational.

Karen A. Longman and Susan R. Madsen

There are well known inequities in gender in both rank and upper administrative roles in academia. As with many behaviors, we need to 'see it to be it.' While knowledge isn't enough for behavior change, it is a key part in the process. As a result, I've selected this book to share information that I have found useful to raise my own leadership capacity, as I hope it will help others as well.

Medicine: A Treasury of Art and Literature

Edited by Ann Carmichael and Richard Ratzan

There is always art and subtlety in medicine, and this collection of medical history helps remind me each day of the mission we strive for as physicians and scientists. My sister gave this to me before I started medical school and it has sat on my desk every day since as a reminder of where we have been as a field and where we are going. I am honored to be a part of the Ohio State Tradition!

His Truth is Marching On: John Lewis and the Power of Hope

Jon Meacham

When I have time to read, I read in history and political science. I tried to maximize this reading during the pandemic to catch up and to read newly published work. John Lewis was my Congressman for the years I lived in Georgia and I was fortunate enough to meet him on a number of occasions. This articulation of his life and work resonates powerfully in this particular moment and will continue to do so for years to come.

*The Four Agreements: A Practical Guide to
Personal Freedom*

Don Miguel Ruiz

The four agreements discussed in this book are simple: 1. Be Impeccable with Your Words, 2. Don't Take Anything Personally, 3. Don't Make Assumptions, 4. Always Do Your Best. I highly recommend this book to anyone who needs a new perspective on how to manage stress and find peace. This book has helped me realize to let go and live. Life is a journey, and we can only control our reactions and not our surroundings, which is one of the causes of unhappiness.

Latino Placemaking and Planning: Cultural Resilience and Strategies for Reurbanization

Jesus J. Lara

I selected this book because it offers a pathway to define, analyze, and evaluate the role that placemaking can have with respect to Latino communities in the context of contemporary urban planning, policy, and design practices. This book illustrates the importance of placemaking for Latino communities and provides accessible strategies for planners, students, and activists to sustainable urban revitalization.

Breastfeeding Answers

Nancy Mohrbacher

I selected this book because it has a wealth of information to help both families and practitioners with optimizing the breastfeeding relationship. It is essential that we help and encourage mothers to improve their own health (reduced risk of diabetes, heart disease, breast cancer) as well as their child's health (reduced infections, cancer, overall wellness). Breastfeeding is the biologic norm for both postpartum women and optimal nutrition for their infant!

AIDS Doctors: Voices from the Epidemic

Ronald Bayer and Gerald Oppenheimer

This book was written 20 years after the start of the AIDS epidemic and it chronicles the stories the physicians and investigators who faced HIV in the early days before there were effective antiretrovirals. I had the fortune to work with several of these physicians who inspired me to pursue a career as an HIV doctor and clinical investigator. So many lessons from the AIDS epidemic recounted in this book are applicable today as we face COVID-19 and prepare to face future pandemics.

Mediocre: The Dangerous Legacy of White Male America
Ijeoma Oluo

I have been (publicly) addressing white mediocrity since my 2011 blog post, “The American Way: Mediocrity, When White, Looks Like Merit.” Still, I learned a lot from Ijeoma Oluo’s *MEDIocre*. As Brittney Cooper’s New York Times review said, it really is an invitation for white men (and all enablers) to do better. Of necessity, that invitation requires telling unvarnished truths. As important, seeing those truths can empower marginalized groups to refuse to carry burdens that don’t belong to us.

*Ghost Boy: The Miraculous Escape of a Misdiagnosed Boy
Trapped Inside His Own Body*

Martin Pistorius

I chose this book to mark this career accomplishment because when I first read it, I thought about the many people I have worked with as a speech-language pathologist who had similar journeys as the author. They had different reasons for being trapped in their body and unable to use their voice, but they also had so much to say. I am better at everything I do because of what they taught me. Lastly, I am indebted to Carrie W., my childhood friend who ignited my passion for this work.

Physics

A Brief History of Time: From the Big Bang to Black Holes

Stephen W. Hawking

This was the first book that helped me articulate some of my most fundamental questions, while giving a context for potentially finding the answers. It crystallized the need to study physics towards understanding any natural phenomena on a fundamental level - especially the entire Cosmos. The first edition features an introduction by Carl Sagan - another hero of mine. Written for the layman, it exemplifies a tour de force exposition upon the impact of the scientific method and critical thinking.

Social Media for Medical Professionals: Strategies for Successfully Engaging in an Online World

David Stukus

This was my 2nd published book and represents a launching point for my professional career and involvement in social media. This was written prior to the COVID-19 pandemic, but the strategies and call to arms outlined in this book are more important now than ever. It is my hope that this book inspires students, trainees, and colleagues from across all healthcare disciplines to lend their voices and expertise in the battle against misinformation.

Peak Performance: Elevate Your Game, Avoid Burnout, and Thrive With the New Science of Success

Brad Stulberg and Steve Magness

As healthcare workers are suffering from burnout, Peak Performance is the first book I read that provided the science of how to thrive across various domains to improve professional and personal fulfillment.

A Sand County Almanac: With Essays on Conservation

Aldo Leopold

I first read this book early in my undergraduate studies. The themes of people, place, and nature provided a framework to consider the connections between humans and the natural world. His joy of simple things helped me recall my early curiosity of the natural world. My wonder and love have grown through seeing my children engage in their own journeys of exploration. May we build on Leopold's land ethic by caring for and restoring the natural and human communities of which we are a part.

The Watcher at the Nest

Margaret Morse Nice

I selected this book in honor of 4M the sparrow, Hope the whimbrel, Wisdom the albatross, A/RR the redstart, 65290 the chickadee, and the millions of other individual birds we ornithologists have banded, tagged, and followed through the years. Their stories have inspired young and old, and through their labors they have given us a window into their lives, introduced us to countless new mysteries, and helped us to conserve and restore their populations. We are forever in their debt.

*Braving the Wilderness: The Quest for True Belonging
and the Courage to Stand Alone*

Brené Brown

I selected this book because true belonging requires us to believe in and belong to ourselves so fully that we can find sacredness both in being a part of something, and in standing alone when necessary. The book encouraged me to show up as my true self; bravely, and foster a sense of strength as a female in academic medicine.

The Essays of Warren Buffett: Lessons for Corporate America

Warren Buffett

I selected this book because Warren Buffett, through his annual letter to shareholders, has been an incredible teacher. He discusses complex topics like investing, accounting, corporate governance, and executive compensation in language that anyone can understand. I aspire to communicate that effectively in my own research and teaching.

*Conflict, Improvisation, Governance: Street Level
Practices for Urban Democracy*

David Laws and John Forester

I selected this book because it contains some of the central elements (and individuals) which drew me into the scholarly discipline of planning. It is about regular people, professionals, and the unusual, nuanced, and intelligent things they do. The book elegantly incorporates many of the theoretical insights that continue to inform my own work, and it is about my home, the Netherlands. Finally, without David Laws, my own journey to an academic career would not have been as interesting.

The Emperor of All Maladies: A Biography of Cancer

Siddhartha Mukherjee

I selected this book because as I was training in my fellowship, it fundamentally helped to shape my vision of cancer and its treatments. It helped reveal the “why” in so much of what we do, and helped to set a framework for my knowledge and learning. I still think back on this book and its lessons when I meet new patients.

Knowledge and Memory: The Real Story

Edited by Robert S. Wyer, JR.

A whole book chronicling an academic Battle Royale between famous social psychologists on the proposition that all of human knowledge is just stories. I read this when I first started at OSU and it inspired some of the research my lab went on to do. It's also hilarious! Roger Schank and Bob Ableson were clearly having a blast responding to critiques.

Strengths-Based Prevention: Reducing Violence and Other Public Health Problems

Victoria Banyard and Sherry Hamby

I selected this book to honor my mentors Dr. Sherry Hamby and Dr. Victoria Banyard who have inspired me to become a resilience scientist. Their work on resilience and strengths-based approaches have taught me a new way of thinking and changed how I view and approach problems. This book teaches us how we can move beyond the pathological perspective and effectively prevent violence, trauma, and other public health problems using a strengths-based approach.

Evidence-Informed Health Policy: Using EBP To Transform Policy In Nursing and Healthcare

Jacqueline M. Loversidge and Joyce Zurmehly

No single reason drove me to choose this book. It could be that I've developed an interest in the use of evidence to inform policymaking, or the experience of writing this textbook with my best friend and colleague. Maybe it's the warm feeling I get thinking about my family and their support during its writing. The message this book conveys is about a world in which we are all guided by evidence and facts influencing our lives instead of letting fears and insecurities determine our existence.
